

SURVEILLANCE: Image Intensifiers

BINOKITE / MAXIBINOKITE Hand Held Night Vision Binoculars

BINOKITE and **MAXIBINOKITE** are part of a family of highly successful Kite night vision sights currently in-service with more than 50 countries worldwide.

BINOKITE and **MAXIBINOKITE** are compact, lightweight binoculars suitable for short-to-medium surveillance or gunnery fire control observation. Both equipments are highly portable and maybe worn around the neck or tripod mounted for fixed observations roles.

- Compact and lightweight
- Highly portable
- Fully qualified and ruggedised
- x4.5 or x6.7 magnification
- Image intensified tube options
- Suitable for short to long range surveillance or gunnery fire control observation

BINOKITE / MAXIBINOKITE Night Vision Binoculars

Maximum user comfort during operation is achieved by use of a binocular eyepiece with dioptric adjustment. The fully ruggedised and qualified designs offer x4.5 or x6.7 magnification and a high resolution image to allow effective operation during low light conditions. Image intensifier options to include high performance European or US image intensifier tubes are available.

Power is derived from 2 commercially available 1.5V AA batteries. User controls are limited to a 3-position ON/OFF/IR-ON switch, adjustable dioptre eyepieces and objective focus.

BINOKITE and **MAXIBINOKITE** are supplied in a transit case, complete with pouch, lens cloth, daylight filter, batteries and user handbook.
