

SURVEILLANCE: Image Intensifiers

KOS/MAXIKOS Hand Held Night Surveillance Sights

KOS and **MAXIKOS** are part of a family of highly successful **KITE** night vision sights currently in-service with more than 50 countries worldwide.

KOS and **MAXIKOS** are compact, lightweight monoculars suitable for short-to-long range surveillance, security or search and rescue observation. Both equipments are highly portable and may be worn around the neck or tripod mounted for fixed observation roles.

- Compact and lightweight
- Fully qualified and ruggedised
- x4 or x6 magnification
- Image intensified tube options
- Suitable for short to long range surveillance, security, search & rescue observation

KOS/MAXIKOS Hand Held Night Surveillance Sights

The fully ruggedised and qualified designs offer x4 or x6 magnification and a high resolution image to allow effective operation during low light conditions. Image intensifier options to include high performance European or US image intensifier tubes are available.

Power for both **KOS** and **MAXIKOS** is derived from two commercially available 1.5V AA batteries. User controls are limited to an ON/OFF switch and objective focus.

Both equipments are supplied complete with carrying pouch, ND filter, pistol grip attachment bracket and user handbook.
